

Guided compact cylinder SSG Series

GUIDED COMPACT CYLINDER SSG SERIES

Eliminate bothersome design and assembly by directly installing on a load!
 The SSG Series providing the super compact cylinder SSD series with a guide rod and plate.

Safety precautions

Always read this section before starting use.

When designing and manufacturing a device using CKD products, the manufacturer is obligated to check that device safety mechanism, pneumatic control circuit, or water control circuit and the system operated by electrical control that controls the devices is secured.

It is important to select, use, handle, and maintain the product appropriately to ensure that the CKD product is used safely.

Observe warnings and precautions to ensure device safety.

Check that device safety is ensured, and manufacture a safe device.

WARNING

1 This product is designed and manufactured as a general industrial machine part. It must be handled by an operator having sufficient knowledge and experience in handling.

2 Use this product in accordance of specifications.

This product must be used within its stated specifications. It must not be modified or machined.

This product is intended for use as a general-purpose industrial device or part. It is not intended for use outdoors or for use under the following conditions or environment.

(Note that this product can be used when CKD is consulted prior to use and the customer consents to CKD product specifications. The customer must provide safety measures to avoid risks in the event of problems.)

① Use for special applications including nuclear energy, railway, aircraft, marine vessel, vehicle, medicinal devices, devices or applications coming into contact with beverages or foodstuffs, amusement devices, emergency cutoff circuits, press machines, brake circuits, or safety devices or applications.

② Use for applications where life or assets could be adversely affected, and special safety measures are required.

3 Observe corporate standards and regulations, etc., related to the safety of device design and control, etc.

ISO4414, JIS B8370 (pneumatic system rules)

JFPS2008 (principles for pneumatic cylinder selection and use)

Including High Pressure Gas Maintenance Law, Occupational Safety and Sanitation Laws, other safety rules, body standards and regulations, etc.

4 Do not handle, pipe, or remove devices before confirming safety.

① Inspect and service the machine and devices after confirming safety of the entire system related to this product.

② Note that there may be hot or charged sections even after operation is stopped.

③ When inspecting or servicing the device, turn off the energy source (air supply or water supply), and turn off power to the facility. Discharge any compressed air from the system, and pay enough attention to possible water leakage and leakage of electricity.

④ When starting or restarting a machine or device that incorporates pneumatic components, make sure that the system safety, such as pop-out prevention measures, is secured.

5 Observe warnings and cautions on the pages below to prevent accidents.

■ The safety cautions are ranked as "DANGER", "WARNING" and "CAUTION" in this section.

 **DANGER:** When a dangerous situation may occur if handling is mistaken leading to fatal or serious injuries, or when there is a high degree of emergency to a warning.

 **WARNING:** When a dangerous situation may occur if handling is mistaken leading to fatal or serious injuries.

 **CAUTION:** When a dangerous situation may occur if handling is mistaken leading to minor injuries or physical damage.

Note that some items described as "CAUTION" may lead to serious results depending on the situation. In any case, important information that must be observed is explained.

Disclaimer

1. CKD cannot be held liable for any business interruption, loss of profit, personal injury, delay cost, or any other ancillary or indirect loss, cost, or damage resulting from the use of or faults in the use of CKD products.

2. CKD cannot be held responsible for the following damage

① Damage resulting from disaster or failure of CKD parts due to fire from reasons not attributable to CKD, or by intentional or negligence of a third party or customer.

② When a CKD product is assembled into customer equipment, damage that could have been avoided if customer equipment were provided with functions and structure, etc., generally accepted in the industry.

③ Damage resulting from use exceeding the scope of specifications provided in CKD catalogs or instruction manuals, etc., or from actions not following precautions for installation, adjustment, or maintenance, etc.

④ Damage resulting from product modifications not approved by CKD, or from faults due to combination with other software or other connected devices.

Safety precautions

Always read this section before starting use.

Refer to Pneumatic Cylinders (CB-029SA) for details on general cylinders and cylinder switches.

Design & Selection

CAUTION

- Use within the allowable load.
Use exceeding the allowable lateral load and rotation torque may result in damage, etc. Refer to the selection guide on page 10.
- Do not use as a stopper.
Use this product in application such as pushers and lifters that are not subject to shocking lateral loads.

- When using this with the cylinder pushed in the middle of the stroke, check that thrust is applied to the end plate axial to the piston rod.
When pushing in the middle of the stroke with a clamp, etc., thrust will be applied to the end plate and the part pushed eccentrically may be damaged. Use at the piston rod's shaft center as shown below.

Installation & Adjustment

CAUTION

- The cylinder switch may malfunction if a magnetized device, such as a steel plate, is near the cylinder switch. Separate from the magnetized device by at least 10 mm from the cylinder surface. (Same for all bore sizes.)

- The cylinder switch could malfunction if cylinders are installed next to each other. Check that the following distances are provided between cylinder surfaces. (Same for all bore sizes.)

- Install a flow control valve when piping. Usable pipe joints are limited, so see the following table to select the joint.

Descriptions Bore size (mm)	Port size	Port dimension		Applicable joint	Joint O. D. øC	Inapplicable Joint
		A	B			
ø12	M5	5.5	5.5	SC3W-M5-4 SC3W-M5-6 GWS4-M5-S	ø11 or less	GWS6-M5
ø16		8	5.5	GWS4-M5

ø50	Rc1/4	10.5	10.5	SC3W-8-6, 8, 10 / GWS4-8 / GWS6-8 / GWS10-8 / GWL4 to 12-8	ø21 or less	GWS12-8
ø63		13	11			
ø80	Rc3/8	16	13	SC3W-10-6, 8, 10 / GWS6-10 / GWS8-10 / GWS10-10 / GWL6 to 12-10	ø21 or less	—
ø100		23	15			

Note 1: The port diameter is M5 for the ø32 5 stroke with no switch.
Refer to dimensions for the port dimension.

Installation & Adjustment

CAUTION

- Check that no dents or damages occur on the end plate that could compromise flatness. Flatness of the counterpart on which the end plate is installed must be 0.05 mm or less.

■ Allowable energy absorption

Use within the allowable energy absorption range. Provide the other cushioning outside if exceeding allowable energy absorption range. Refer to the Specifications for allowable energy absorption values.

During Use & Maintenance

CAUTION

- Do not disassemble this product. The performance may be compromised.

Dimensions

● Notes on switch installation groove

Note 1: Tube bore size $\phi 12$ to 20 does not have a switch groove on the piping port face.

Note 2: For tube bore size $\phi 12$ and 16 switch grooves, only one row is provided on each face.

Note 3: Only F type switch is installable on the tube bore size $\phi 25$ piping port face.

Note 1: When calculating A + and B + stroke dimensions for the intermediate stroke, do not set the intermediate stroke in the stroke. Instead, set the next larger standard stroke. Example: If the intermediate stroke is 7 mm, calculate including standard stroke 10 mm.

Note 2: HD and RD dimensions for the 5 stroke will differ from these due to manufacturing.

Note 3: The port size is M5 for the $\phi 32$ 5 stroke with no switch.

Note 4: Dimensions in () of C and D columns are values for the 5 stroke with no switch.

Note 5: Dimensions in () of A, B, HD, and RD columns are values for 75 and 100 strokes.

Note 6: Dimensions in () of A and B columns are values for 2-color indicator and preventive maintenance output with switch (L1).

Note 7: Dimensions □

How to order mounting bolt

How to order

SSD - BOLT - d X L Refer to the following table for "d" and "L".

Note: This product comes with 4 bolts as a set, however it requires just 2 bolts.

eg.) SSD-BOLT-M5X65 for SSG-L-32D-30

Port size	ℓ	d	L		
			50 stroke or less		75,100
			Without switch	With switch	Stroke length
ø12, 16	6.5	M3	20 + stroke length	25 + stroke length (Note 1)	
ø20	6	M5	20 + stroke length	25 + stroke length	
ø25	8	M5	25 + stroke length	35 + stroke length	
ø32	7.5	M5	25 + stroke length	35 + stroke length	35 + stroke length
ø40	6	M5	30 + stroke length	40 + stroke length	40 + stroke length
ø50	11	M6	35 + stroke length	45 + stroke length	45 + stroke length
ø63	13	M8	40 + stroke length	50 + stroke length	50 + stroke length
ø80	17.5	M10	50 + stroke length	60 + stroke length	60 + stroke length
ø100	18	M10	60 + stroke length	70 + stroke length	70 + stroke length

Note 1: The value is "30 + stroke length" for SSG-L1.

Material: Steel
Treatment: blackening

d: mounting bolt screw diameter
L: mounting bolt length
ℓ: counterpart possible screw-in length
(Note) Mounting bolt is shown with d X L.

Allowable lateral load

Allowable lateral load is when load is applied to the end plate edge.
If the center of gravity of the workpiece installed on the end plate separates, calculate the separated distance as the stroke.

Allowable torque

Unit: N · m

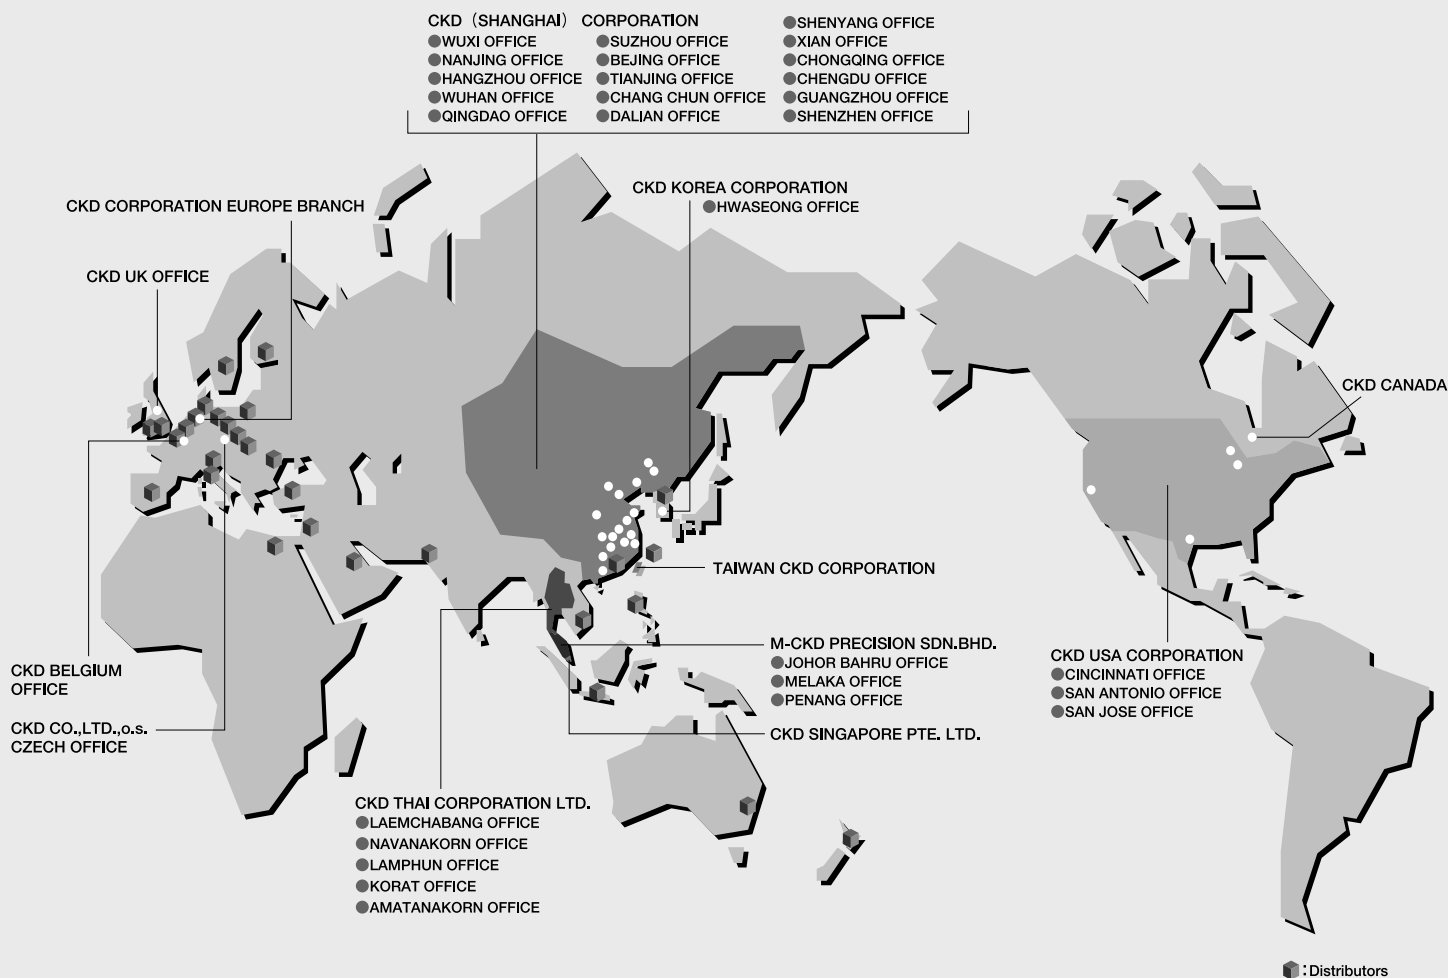

Bore size (mm)	Stroke length							
	5	10	20	30	40	50	75	100
12	0.12	0.10	0.080	0.066				
16	0.16	0.13	0.10	0.085				
20	0.40	0.35	0.28	0.23	0.20	0.17		
25	0.44	0.38	0.31	0.25	0.22	0.19		
32	0.69	0.62	0.51	0.43	0.38	0.33	0.26	0.21
40	1.1	0.99	0.83	0.72	0.63	0.57	0.45	0.37
50		1.9	1.6	1.4	1.2	1.1	0.87	0.73
63		4.3	3.7	3.3	2.9	2.6	2.1	1.8
80		7.9	6.9	6.2	5.6	5.1	4.2	3.6
100		12	11	9.9	9.0	8.3	6.9	5.9

Revolvable angle tolerance (Reference value)

Bore size (mm)	Revolvable angle tolerance θ (°)
ø12, 16	±0.2
ø20, 25, 32, 40	±0.1
ø50, 63, 80, 100	±0.08

(PULL for default)
Note: Excluding deflection of guide rod
